Bristol Bay in the News July 3, 2013

Alaska Native and Olympic snowboarder Callan Chythlook-Sifsof wrote a well-received piece in the New York Times that was one of the most read articles of the day. Titled, "Native Alaska, Under Threat," the opinion piece described her upbringing in Bristol Bay and the native community's reliance on and reverence for salmon and deep concerns about the Pebble Mine. Chythlook-Sifsof concluded: "The E.P.A. can block the mine under the Clean Water Act — something our government has done rarely and judiciously. If ever there were a case for using this power, Bristol Bay is the place, with a fishery of global scale and value, and Native communities dependent upon salmon."

Salon magazine asks whether Pebble and its massive tailings ponds may spell the end of half the world's sockeye salmon. "All that waste would be held back behind an enormous dam in a tectonically active area. Fifty years or more down the road, when the mine is empty of useful minerals and abandoned, the dam will still stand, expected to contain a deadly mix of chemicals in perpetuity, a ticking time bomb in an earthquake-prone area," writes Aaron Kase.

The Bristol Bay sockeye salmon run may be headed for a banner season, with the largest catch at this point in the season in more than 40 years – since 1967.

A letter to the editor in the Washington Post takes the mining companies' claim that a mega copper mine can coexist safely with a thriving global fishery. In an excerpt, Joel Reynolds writes: "While the mining companies promise they can engineer adequate protection, Environmental Protection Agency scientists say a breach in containment would be "catastrophic," and harm to the fishery, wildlife and surrounding communities would be widespread even if Pebble or any other large-scale mine in that location were to operate perfectly — which no large mine ever has."

Lastly, two investment firms, Trillium and Calvert, representing 27 investors with over \$35 billion in assets, called on the Environmental Protection Agency to protect Bristol Bay from unacceptable, adverse impacts of mine waste. At the same time, a group of 100 jewelers representing \$6 billion in sales—including Tiffany & Co., Zales and Helzberg Diamonds — pledged support to protect Bristol Bay from the Pebble project and committed to never using metals mined at the site.
